Problem Statement

Students are already busy with school and other extracurriculars, so they do not have time to wait an hour just to get food or exercise. Our solution should help students figure out the wait times for food or the gym and plan around them.

What is the Problem?

The wait times at retail dining locations and athletic facilities around campus are extremely long and inconvenient for those short on time.

Who is Experiencing the Problem?

Everyone who gets food or works out on campus experiences this problem.

Where Does the Problem Present Itself?

The problem presents itself in campus retail restaurants & recreational facilities.

Why Does it Matter?

It matters because college students are already pretty busy with work so having to wait in lines for hours is not optimal.
